

Water Treatment Plant In Iraq

Photo: USAID/Thomas Hartwell

Anmar S. Muhammed, an Iraqi civil engineer working for USAID, surveys the site preparation.

Construction is underway at the Saba Nissan water treatment plant in Baghdad, as part of a USAID \$15 million dollar project to expand drinking water for the Baghdad region. The new extension will increase potable water capacity by 225 million liters per day and will serve 640,000 Baghdad residents. USAID is working closely with the Iraqi Ministry of Water Resources and the Coalition Provisional Authority.
